Fan Out's Fluorine Combs are made from a mixture of high-grade fluorine and Polyetherimide plastic. Due to this mixture, our combs create low friction and minimal static, enabling them to flow smoothly through your hair; preventing split ends, hair loss and cuticle damage. Our combs are chemical resistant and heat resistant up to 210°C. Fan Out's Fluorine Combs are professional grade combs for the everyday person.

We also offer a Carbon comb, which is a mixture of carbon, fluorine and Polyetherimide. Our Carbon comb eliminates any static while going through your hair.

Product Name	Fluorine Comb F210
Color	Pearl Ivory Pearl Rose Carbon Black
Product Number	Pearl Ivory : F210-PI Pearl Rose : F210-PR Carbon Black : F210-CB
Materials	Pearl Ivory : Fluorine and Polyetherimide Pearl Rose : Fluorine and Polyetherimide Carbon Black : Fluorine, Carbon and Polyetherimide
Size	Length: 22.5 cm ( 8.85 in ) Width: 4.5 cm ( 1.77 in )
Weight	approx. 38.4 grams ( 1.35 oz )
Made in Japan
