Why Drug Test?

9 out of 10

Drug abusers work at small to medium-sized businesses. The same statistic is also true for employed heavy drinkers. These businesses employ the most users, but drug test the least.

Accidents at work

Employees who use drugs are up to 50% more likely to be involved in a workplace incident, and substance abusers incur 300% higher medical costs than non-abusers.

Drug-use problems

Include issues ranging from lost productivity, absenteeism, injuries, fatalities, theft and low employee morale, to an increase in health care legal liabilities and workers' compensation costs.
