## FAQ

### Why do I need to press a button to smoke?

The Juul® automatically disables smoking when it's being charged. Our patent-pending button instantly disables charging while being pressed so you can smoke without removing the Juul® from the Moda.

### How much battery does the Moda provide?

At 2000mAH, the Moda allows the Juul® to last twice as long, enough to go through two pods.

### How does the battery indicator work?

The battery indicator on the side of the Moda provides a 3-bar indicator of the battery level of your Moda Charger combined with the charge of your Juul®.

### How do I charge the Moda?

Easy! Just keep your Juul® in the Moda Charger and drop it into the same USB charger that the Juul® uses. This will charge the Moda and the Juul® at the same time. The battery indicator will let you know when charging is complete.

### How many charge cycles will I get from the Moda?

You can recharge your Juul® for over 500 full cycles. A full cycle is when you recharge the Moda from 0% to 100%. Partial cycles, like charging from 25% to 100%, will not count as a full cycle until all of the partials equal 100%.

### Which vaporizers is Moda compatible with?

The Moda is only compatible with the Juul® at this time.

## Ready for endless smoking?
