

BIM Connect™

Collaborate with Non-Revit Users

BIM Connect™ allows users to export data from Revit into Excel and import data from Excel into Revit. It is an excellent tool for Architectural Programming. BIM Managers can use BIM Connect™ to manage BIM standards, for information exchange, and to maintain the overall quality of the project.

Top Features

- Manage/View Independent Data
- Create Unplaced Rooms/Spaces
- Use Excel's Powerful Editing Tools
- Import Excel Data to Revit
