

BALANCE™ Stress & Dehydration Aid

"I recommend BALANCE Stress & Dehydration Aid to help control the stress associated with transporting. Animals on BALANCE are much calmer to handle and load, leading to less transport morbidity and mortality."

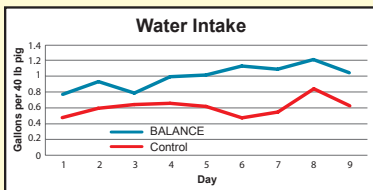

Natalie Baker, DVM
Boonville, Indiana

Treat a 40 lb pig for less than a penny a day!

In a clinical trial, BALANCE Stress & Dehydration Aid increased water consumption and caused reduction in rectal temperature in pigs where the barn temperature and humidity were manipulated to extremes. Daytime barn temperatures averaged 105° F and 80% humidity for 5 days.

- Results showed increased water consumption in the BALANCE group (1.0 gallons/40 lb pig/day) as compared to the non-treated control group (0.61 gallons/40 lb pig/day).
- There was a reduction in rectal temperature in the BALANCE group (average 103.1° F) as compared to the non-treated control group (average 103.6° F).

Directions: Mix 3 cups (780 grams) with 5 gallons of stock solution (meter 1:128). Mix 3 cups with 640 gallons of water.

Visit our website or call for a complete copy of the study.

Available in 40 lb buckets and 780 gram packets.
