

Objectives for POP IT

- Minimize patient's stress and anxiety associated with invasive procedures
- Increase coping and comfort
- Improve patient's and caregiver's overall experience
- Provide more consistent care/standardize the process of care of the pediatric patient during painful procedures not only in the Pediatric ED but throughout GCHSWF and Lee ED system

Learning Objectives

- Describe **POP IT** project
- Recognize the importance of **POP IT** during invasive procedures and how these practices can impact patient and family experiences
- Understand the rationale and importance of **POP IT** from a nursing perspective
- Discuss how to implement a similar program in other hospitals
