L3D Cube

Your personal, interactive 3D LED display

6x L3D Cube **\$199.00**

An interactive lava lamp for the 21st century. The starter "Casual L3D Cube" is your light show on the go, for home, dorm, or office use. Ships with clear casing.

8x L3D Cube **\$399.00**

A personal 3D LED display for hackers like you. Our most popular L3D Cube uses 512 full-color lights to create stunning visualizations. Ships with clear casing.

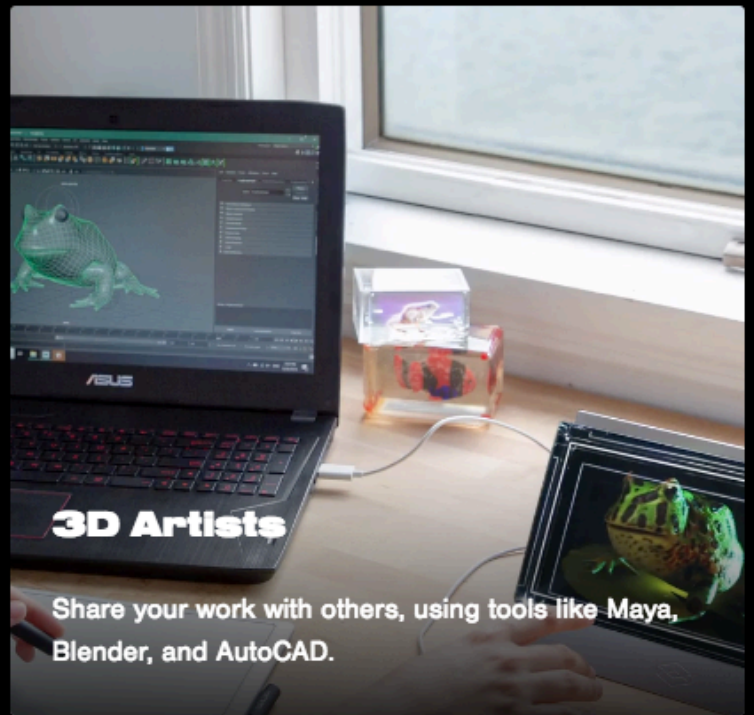

16x L3D Cube **\$2,500.00**

Don't be intimidated by this monstrosity of a L3D Cube. This array of 4,096 lights is your one-way ticket to volumetric domination.

ADD TO CART

All 3D creators welcome.

The Looking Glass is the first desktop holographic display designed for 3D creators. No VR or AR headgear required.

Add your own peripherals.

Extend your Looking Glass with a wide-range of peripheral add-ons including the Leap Motion Controller, Nintendo Switch Joy-Con Controllers, Intel RealSense, Microsoft Kinect, Xbox Game Controller, Arduino and more!

As of July 24, we just launched the Looking Glass on Kickstarter for pre-order, with the first shipments going out as early as September. Head on over to our Kickstarter page to get your hands on one of the first Looking Glasses!

. . .

This is a tutorial on how to set up your first scene with the HoloPlay SDK for your Looking Glass. In it, we'll be going through and altering the example scene included in the Unity package. This tutorial assumes that you have already installed Unity. If you have not, please see instructions on how to do so here. This tutorial also assumes that you have set up your Looking Glass and your computer settings correctly following this tutorial.

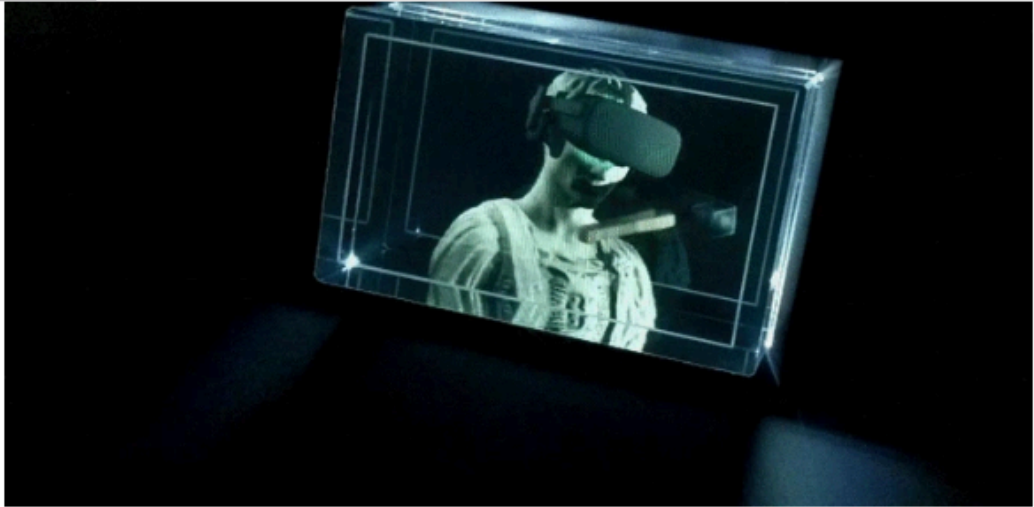

Now, download the latest HoloPlay SDK.

The Sloth Special (NEW!)

FOR A LIMITED TIME ONLY!

Soooooo, your slow-ness has finally paid off. You missed the Day 1 and Day 2 specials, but now you can get the Standard Looking Glass for nearly the same super-reduced price but with a slightly slower delivery date (2 months later.) All sloths welcome.

Receive a standard (8.9") size Looking Glass along with the HoloPlay SDK for Unity, and the App Library to open up a world of 3-D content. This normally lists for \$600. This special pricing lets you save \$201 for a limited time only. Pledge an additional \$99 to receive the Interaction Accessory Pack.

Shipping and handling calculated separately at checkout. This tier ships at a slightly lower cost and slower shipping speed for all countries.

INCLUDES:

- Standard Looking Glass

Anywhere in the world

The Looking Glass is designed by and for 3D creators and we've created a number of tools to enable 3D creators to easily bring their work to life in the Looking Glass.

- All of the Looking Glass apps shown on this page and our website were made using our **HoloPlay Unity SDK**. As a backer, you will get [access to this SDK](#) so that you can create interactive holographic apps of your own.
- 3D model and animations in OBJ, FBX, STL and glTF format can be imported into the Looking Glass with a couple clicks using the **Model and Animation Importer App**.
- Dozens of holographic apps are available for free download using the **App Library**, included with every Looking Glass shipment. These include volumetric video clips, holographic film shorts, lightfield and 3D scan viewer apps, new types of holographic games, virtual pets, CT-scan/DICOM importers, a WYSIWYG 3D model previewer for 3D printing, and much more. By the end of the year, creators will also be able to share their own apps via the Library with Looking Glass owners around the world.

UNITY DEVELOPERS

- Construct three-dimensional game scenes with expert 3D lighting and positioning changes in real-time, directly in the editor.
- Have the ability to test how a character or asset behaves in a scene when you move it around the 3D space.
- Magical worlds at your fingertips! The Looking Glass allows for a wide-range of peripheral add-ons including the Leap Motion Controller, Nintendo Switch Joy-Con Controllers, Intel RealSense, Microsoft Kinect, Xbox Game Controller, Arduino and more!

Want to get started right away? [Download our SDK](#) for Unity and check out our [Getting Started Guide](#).

Looking Glass along with the HoloPlay SDK for Unity, and the App Library to open up a world of 3-D content. Get the lowest pricing possible for the Standard Looking Glass by getting this four-pack. Save 33%.

Pledge an additional \$396 to receive four of the Interaction Accessory Packs which includes a Leap Motion Controller, a special carrying case and microfiber cloth with your pre-order.

Shipping and handling calculated separately at checkout.

INCLUDES:

- 4x Standard Looking Glass
