About Us

At ECO we would love nothing more than to help you be successful on your next adventure. We want to be a company that appeals to the family oriented hunter/hunters. We believe the youth and or first time hunter is the very most important client that we could have the privilege to guide. Hoping that a

fun, memorable, successful hunt brings them back again and again on the hunt. Every one of us that ventured into the outdoors, on a hunt, years ago was led there by someone important to us that helped install a passion for the hunt and we would like to help you make this happen in your life. In today's fast paced crazy world it is tough to get enough time in the outdoors and we know how valuable every minute is. We believe God gave us the outdoors to help bring us back to reality and the real importances of life. ECO is proud to assist with quality time outdoors and making sure we give our clients the very best opportunity at harvesting your trophy.

REQUEST INFO

Trophy Mule & Whitetail Deer Hunting

We also have leases that produce some truly amazing specimens that would be a trophy on anyone's wall. Mule deer in the 180-200+ inch range, whitetails in the 150-170 inch category can be had on several occasions. These leases are very large tracts of land that have some pretty challenging terrain that allows these animals to grow to true trophy range, not to mention large tracts are easier to manage animals so we allow them to reach maximum potential.

World Class Professional Outfitting

We are setup so that when you arrive we can hit the range to check zero's on rifles and even verify dope charts for those of you whom are hoping to harvest an animal at long range. We realize that not every hunter or hunters setups are capable of long range kills, so this time at the range allows our guides to get to know you and you them, so that we agree on what range we need to accomplish for you. So that when the moment of truth arrives it is a one shot, one kill, which you are very proud of. This is a very crucial piece for our youth and first timers, so things are done as cleanly as possible to allow them nothing but great memories. Once you have harvested your animal we have

local lockers we work with to take care of the wild game meat along with horns and cape. If you wish to donate your meat we work with places so that it gets used by those that need it.
