Improves Articulation. Improve the articulation of your Jeep JK with a RLT Adjustable Control Arm Kit. Designed for 3 plus inches of suspension lift, this complete kit includes 8 rugged control arms that are equipped with Heim Joints to maximize articulation. This RLT Control Arm Kit was designed with the adventurous Jeep enthusiast in mind.

Single On-Car Adjustable. Unlike some other aftermarket control arm kits that are fixed, RLT Control Arms are single on-car adjustable. This allows you to precisely dial in your suspension settings, specific for your lift/application, to ensure you stay safely on the road or the trail.

Durable Construction. RLT manufactures their Controls Arms from heavy duty steel tubing for superior strength and rigidity. The Arms are completed in a black powder coated finish for durability and long lasting corrosion resistance. RLT's Control Arms come complete with zinc coated heim joints that are greasable to eliminate binding.

Bolt-on Design. RLT engineered their Adjustable Control Arms to be a direct bolt-on replacement for the stock arms. Installation can normally be completed in about 5 hours' time with just basic hand tools. The Arms will need to be adjusted to the proper pinion angle for your specific lift. Please note that an alignment is highly recommended after installation.

Application. This set of eight RLT Adjustable Front and Rear Control Arms are designed for use on 2007-2018 Jeep Wrangler JK models.

Fitment: 2007, 2008, 2009, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018 [Details](#)

Questions & Answers (8)

5 Top Rated Questions

Q: Is there enough adjustment in these as to get the axle back to factory center in the wheel well to get the tire away from the pinch seam in the rear? I'm running a 3-1/2" lift with 37" tires. Need all of the clearance I can get.

A: The Mammoth Adjustable Control Arms should allow you to pull the axle back to center.

Helpful (1)

Q: Will these fit the 4 door model JKU?

A: These control arms are able to be used on the JK and the JKU.

Helpful (0)

Q: I have a 2014 JK with the Mopar 2.5" lift. Would these be applicable ?

A: These control arms are not compatible with a 2.5" lift, only 3"+ lifts.

Helpful (0)

Q: Is there enough adjustment in these as to get the axle back to factory center in the wheel well to get the tire away from the pinch seam in the rear? I'm running a 3-1/2" lift with 37" tires. Need all of the clearance I can get.

A: These will allow you to recenter the axle with the lift and tires you have installed on your Jeep as these are designed to be used with a lift 3"+ .

3 More Questions

will this work for 6" of lift? 1 answer

Are these rebuildable? The description does not specify. 1 answer

Will this work with a 2.5 JKS lift on a JKU? 1 answer

Q: What is the best way to measure the length your going to need out of your control arm to get the axel back to center after lifting the jeep 3.25"?

A: This will vary from vehicle to vehicle and lift to lift. We would recommend starting with the arms extended about 1/2" to 1" longer than stock and then measuring and adjusting as needed.

Great set of adjustable arms

These adjustable arms were a nice surprise. Built very well. Install was pretty straight forward with basic mechanical skills. You won't be disappointed!

Excellent

Bought to correct pinion in the rear for new ds and set castor up front. Fit well and instructions are helpful. Seem to be very well built and much stronger than factory. To use the most overused word in the jeep community, these things are BEEFY.

Everything I hoped for.

I was worried about the strength and fit of the product due to the reasonable price. These arms are much heavier duty than stock and should perform as expected. I rock crawl and will be heading to the Rubicon and later back to Moab and I feel confident that these will work. I needed the adjustability for pinion angle adjustment (front) and to move the rear axle back a bit toward the center of the wheel well. Both were accomplished. I have a 2106 JKU with AEV 4.5 lift and 37" s.

Great arms for the money .

Instructions are very good. You have to make sure you get a thrust alignment after installing these. They say to put the Home joint to the axle the uppers do not go to the axle only the lower do. Other than that great arms for the money so far.

Meet Our Team

James C, 2006 Jeep Wrangler TJ
Customer Service

I've always loved Jeeps from a young age, after moving to Puerto Rico at the age 9 my uncle had a Cherry Red 73 CJ5 which I fell in love with. He would use that Jeep to ride up the mountains on his farm, I knew after seeing that Jeep I would have one. The fact that a Jeep can be so versatile in ever...
