Answer:

All the other screen protectors I've seen say they can't go edge-to-edge because the phone has a slightly curved screen. So how does this one do it?

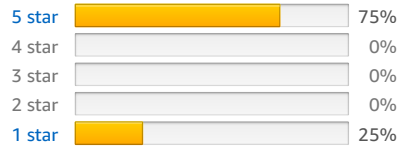

It actually doesn't cover the entire screen. There is about 1/8" not covered around the edge. The reason given is that if you put it in a case, the case will push

I used both protectors and followed the instructions carefully, but each time they had large (nickel sized) bubbles. Very annoying. Unfortunately I would not recommend buying this product.

They are easy to operate
These are very cheap and of good quality.They're so sharp, they feel like the iPhone7's screen.My mobile phone is always on the ground, serious damage is a small crack.I'd rather have these protectors than have my iPhone7 screen shatter!

I've purchased numerous glass protectors over the years and I think this is a solid deal. Even with the expensive glass protectors, with free replacement warranty, I've had to pay for shipping which is usually about the price as both of these glass protectors anyway. These will crack over time (and chip) but they're easy to peel off and they do their job of protecting the screen behind it. This kit includes all that you need in order to get the phone's screen clean and the tool which aids in perfect alignment. Once you set the protector on the screen you just have to tap and it will adhere on its own. Any bubbles are easily pressed away and I'm happy with the result. One of the wet wipes was dried out but not a big deal. Overall I'm happy with this product and would recommend for others. Durability is an unknown so only time will tell. The protector does not go to the very edge, as others have stated, but this is common with the rounded screens. With a screen protector on it's not as noticeable to me and it's not a big deal in my opinion anyway

Great protection. At the beginning, it seemed like it wasn't going to be a good fit because there were a few bubbles. But they disappeared now and it looks great.

Color: Black

What I like best about the product is that it feels just like the "naked" screen and it is precision cut to fit perfectly.Their cleaning stickers are great for preventing dust bubbles too.
