

Increase productivity and operational efficiency; while reducing support time and costs.

NCDC provides Consulting, Technology, and Cybersecurity services to commercial and government organizations. We are dedicated and committed to delivering excellence through the Corporate Solutions and Services (CSS), Government and Defense Services (GDS), and Professional Development Center (PDC). As a Woman and Minority Owned Small Business, NCDC offers cost-efficient, scalable, flexible, and high quality solutions for our customers in the Private and Public Sectors.

Core Capabilities

Our technology experts and business professionals design, develop, and deploy solutions in the following core areas:

- **Consulting Services** - Integrate enterprise solutions to enhance the performance of your organization. By incorporating industry standards and best practices into your business processes, we can help you stay ahead of the competition and better serve your customers.
- **Technology Services** - Focus on designing, developing, and deploying robust and secure technology solutions. By aligning business objectives, critical success factors, and operational processes with data and technology, we can ensure that as-designed solutions are fit-for-purpose.
- **Cybersecurity Services** - Deliver holistic security solutions designed to protect confidentiality, integrity, and availability of enterprise assets. By merging security standards and frameworks such as ISO 19770/27000, NIST 800-53, COBIT, and FFIEC controls into your process and systems, we can help protect your enterprise; while you focus on your operations.
