This New Harvard Discovery Activates Your "Fat Burning Gene" So You're Able to Burn More Fat and That Means Sustained Natural All Day Energy

"A slew of health benefits have been attributed to SIRT1 activation in hundreds of studies, including several small human trials". - Scientific American

You may be wondering a little about how this product came to be.

Let me tell you a quick story about caloric restriction (which is eating every other day, or eating during an 8 hour window each day).

At the time I was trying to lose weight and improve my health and mental performance through caloric restriction.

I was struggling with hunger pain and brain fog from not eating.

And I was getting more and more moody and frustrated from starving myself.

Then something really bad happened: I actually gained weight from binge eating after starving myself.

Which meant I couldn't reach my health goals.

As you can imagine, I was depressed and desperate, but I wasn't ready to give up on my dream of enjoying the remarkable rejuvenating health benefits of caloric restriction.

Then a Harvard professor I hired introduced me to natural ingredients that activate the SIRT1 gene, the gene associated with the benefits of caloric restriction.

At that point, everything changed!

We finally figured out how to:

Use these natural ingredients to activate the natural cellular clean up and renewal process

Increase fat burning for more energy production inside every cell in the body

Mimic the energy and health benefits of caloric restriction...in an easy to take pill

Because I was introduced to these natural ingredients that activate the SIRT1 gene, the gene associated with the benefits of caloric restriction, I was able to:

Boost energy and vitality
Improve mental energy and performance

Promote heart health and help people overcome most difficult health issues of aging

Now I'm living my dream of enjoying the remarkable rejuvenating health benefits of caloric restriction and I never have to worry about restricting my calories to specific times ever again.
