The navigation menu is identical to the 'About Us' page. The page title is 'History'. The main content area contains two paragraphs of text. The first paragraph explains that the company was created with the spirit, influence, and vision of classic bicycle aficionados, and notes that throughout the last several decades, there have been too few original and authentic brands offered to consumers, especially in the bicycle industry. It criticizes the industry's focus on profit over quality and volume. Steady Bicycle Company was created with the spirit, influence, and vision of classic bicycle aficionados. Throughout the last several decades there have been too few original and authentic brands being offered to consumers, especially throughout the bicycle industry. So many products of today exceedingly focus on prioritizing profit over quality, and volume at the expense of high standards. This philosophy in manufacturing has been an epidemic in the bicycle and action sports industry.

We proudly inform our customers that we do not participate in short term trends, nor do we produce bicycle models to keep up with the latest cycling industry fads. Steady Bicycle Company only produces bona-fide modern classics that are Built With Love to the highest quality and craftsmanship standards. We are not just a brand, we are a culture.
