## Story Development

Your brand is more than simply a great logo, a high converting website or more followers on Instagram. If you don't have a powerful story to tell, more social media hits aren't going to do anything to your bottom line.

The top brands in the world tell a powerful story. With over 4 Billion people online visiting over 1 billion websites every day, what sets you apart from the rest? A better question is, what story are you telling?

Every touch point of the customer experience and how they think about, feel and talk about your brand – IS your brand. Not just what you say it is.

So what are you doing to **influence** that conversation?

LET'S DESIGN YOUR SUCCESS STORY

## Launch Strategy

According to the Marketing Research Association, only 40% of developed products make it to market and about 25% make any revenue at all. The other three quarters of product launches are either underfunded false starts, legitimate experiments for market research or simply complete failures.

way you manage the dynamics of creation and adaptation.
