## June 2019

The Bulletin of the American Orchid Society

### Featured this month

This month grower of *Catasetinae* extraordinaire, Fred Clarke, treats us to the first installment of his new series on this fascinating group of plants. Part 1, titled *The Cat's Meow: New Developments in Breeding and Growing Catasetums* is not to be missed. The plan is to publish new installments every other month. Also featured in this month's issue is the first of two parts on the genus *Maxillaria* written by Esteban (Steve) González-Costa. This first installment covers the larger flowered species and the second installment will address the smaller flowered species and hybridizing in the genus. Rounding out our features is a survey of the native orchids of Montana provided to us by 17-year-old Ansel Fiddaman.
