WINDOWS

The classic! Minecraft: Java Edition supports cross-platform play between macOS, Linux and Windows. This edition supports user-created skins.

MINECRAFT

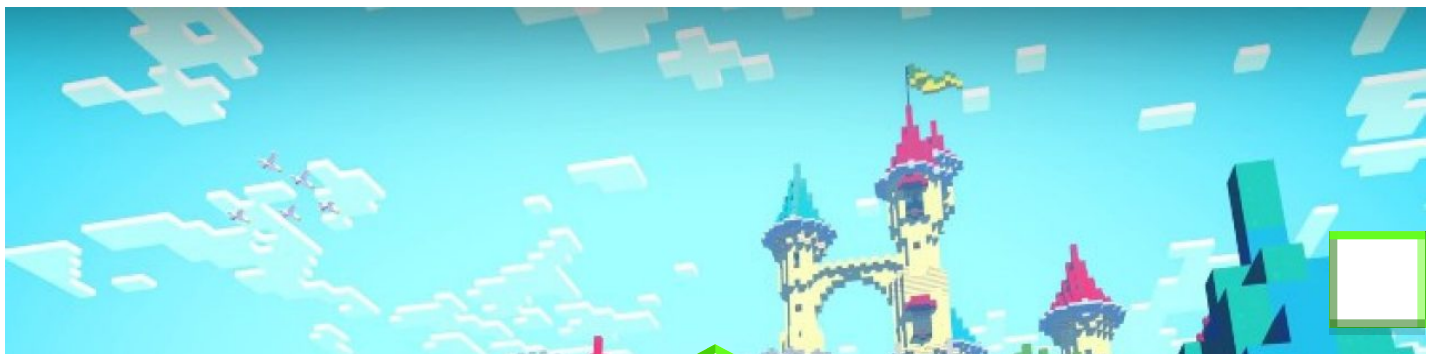

ENTER THE HIVE

The Hive server, now available to more Minecraft players!

Minecraft servers! They're a terrific way to play multiplayer Minecraft with players from all over the world. Java players have had access to servers for a long time, but we've steadily been adding servers to the Better Together version of Minecraft (so that's Minecraft on Xbox One, Nintendo Switch, Android, iOS and the Windows 10 version).

Today we're adding another, **The Hive!**

Shall we celebrate with a lovely launch trailer? LET'S DO IT:

MINECRAFT

There are loads of great mini-games on The Hive server, including a brand new way to play BedWars **Treasure Wars**, the all-time favorite classic **Hide and Seek**, and the action-packed parkour game **DeathRun**.

The Hive offers servers in two locations, North America and Europe. Don't worry - you'll automatically join the one closest to you! With servers launching in Japan in the near future, the best experience is guaranteed for everyone. [For more on games, features and updates, check out The Hive's website!](#)

So if you're playing Minecraft on Xbox One, Windows 10 edition, Nintendo Switch, iOS and Android, go to 'Play' in the main menu and then to the servers tab. Then enter **The Hive**. If you can't see it yet, check back soon, as it'll be rolling out on all those platforms today. Enjoy!

I actually played this game but i feel jealous of the java edition that have shields. I was hoping that it'll be added in the pe version. I quit this game for a while with a hope that shield will be added in this game. And, guess what? MY DREAMS COME TRUE! Thank you Mojang.
