Liberty Electronics specializes in manufacturing electronic wiring harnesses, cable assemblies, complete cabinet and panel assemblies and electro-mechanical assemblies.

We comply with the most stringent military and best commercial practice requirements for electronic assembly, and we have a proven track record of program cost savings, and reliability improvement solutions.

Liberty provides Program Management Services including:

- timely status reports to each customer
- fast accurate answers to customer inquiries
- internal configuration management

Share our broad electronics assembly experience, and see the results with your program.
