## TOASTED CINNAMON OAK LAMINATE FLOORING SYSTEM with SplashDefense™ ITEM #1203881

**10 planks (20.15 sq ft)**  
6-1/8 in wide x 47-1/4 in long x 3/8 in thick  
(plus 1/16 in underlayment pad)

**10 planks (1.872 sq m)**  
15.6 cm wide x 120 cm long x 10 mm thick  
(plus 2 mm underlayment pad)

### UNMATCHED TECHNOLOGY in every layer:

1. **Protective Layer** – Ensures resistance to wear and staining
2. **Design Layer** – Beautiful designs inspired by nature
3. **Core Layer** – High Density Fiberboard (HDF) provides strength
4. **Balance Layer** – Prevents warping and bowing
5. **Premium Pad Attached** – Pad is attached to each plank for easy installation and an authentic hardwood sound

### INSTALLATION. Install your floor in a weekend. Enjoy it for a lifetime!

- + Planks simply click together.
- + Pre-attached pad makes installation easier while creating an authentic hardwood sound.

### MOLDINGS. Give your floor the finishing touch.

### Guaranteed to resist spills up to 24 hours.

### SUPERIOR DURABILITY.

- + Superior resistance to wear, staining, fading and denting.
- + Defends against everyday spills up to 24 hours.

### LOW MAINTENANCE.

- + Just sweep with a dry dust mop or wet mop if needed.

### ENVIRONMENT. Environmentally responsible.

- + CARB compliant and contains 70% pre-consumer recycled material.

Harmonics® — providing quality flooring and career opportunities right here in the USA.

# INSTALLATION INSTRUCTIONS

## JOB SITE / EMBLACEMENT / EMPLAZAMIENTO DE LA OBRA

### Site Requirements

Laminate is a durable floor covering, not intended as structural material. Laminate requires a clean, dry, secure subfloor that meets building codes. The following requirements are not intended to supersede Federal, State or local building codes, but as with many other interior finish products, may require modifying existing structural components for successful installation. Owner assumes responsibility for compliance with all building codes. Laminate floor is suitable for use in climate controlled (35–65% RH and 60–85°F) indoor installations only and should not be installed in rooms with floor drains or sump pumps. Laminate floor can be installed above, on or below grade. A moisture test is strongly recommended to determine if high moisture exists in the subfloor. When using a calcium chloride moisture test for concrete subfloors (ASTM 1869), values must be  $\leq 5 \text{ lbs}/1000\text{ft}^2/24\text{-hr}$  or  $<80\%$  RH with an in situ probe (ASTM F2170). Moisture readings of wood subfloors must be  $\leq 12\%$ . Acceptable job site conditions, including relative humidity and subfloor moisture conditions, must be maintained throughout the lifetime of the flooring. Laminate flooring is installed as a floating floor and requires the use of T-moldings in doorways 4 ft (1.22m) or less and in rooms 40 feet (12.2 m) or larger in length or width. Floor movement must not be constrained by glue, nails, screws, hardware or other fixed obstructions. This product must be installed in accordance with these installation instructions.

## SITE AND MATERIAL PREPARATION / PRÉPARATION DE L'EMPLACEMENT ET DU MATÉRIEL / PREPARACIÓN DE EMPLAZAMIENTO Y DE LOS MATERIALES
