

EnviroFinish System

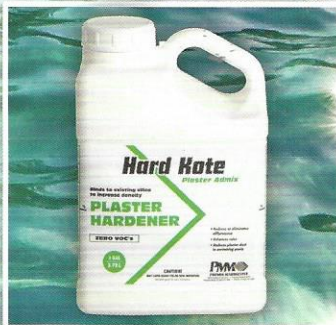

NO ACID • NO TOXIC WASTE

1

Use PMM Marquis Magic or Marquis pool finish

2

Add PMM Hard Kote to pool finish

3

Buff with PMM EnviroFinish Polisher

PMM
PREMIX MARBLETITE

a quality brand of
QEP

EnviroFinish Polisher

The EnviroFinish Polisher is a low speed portable polisher that eliminates the need to acid wash new pool finishes.

5-10 gallons of acid are used in typical pool acid washes; that translates to 200-300 gallons of toxic water being flushed into our water systems before a pool is complete. With the EnviroFinish System and EnviroFinish Polisher, there is *No Acid, No Disposal and No Residue.*

Technical Specifications

- ◆ Power input: 350 W
- ◆ Speed: 4000 – 10000 RPM
- ◆ Voltage main supply: 90 – 240VAC
- ◆ Voltage to sander: 22VDC

Featured Pool Accessory Products

Bond-Tite BONDING AGENT

Bond-Tite is a two component factory blended mixture of liquid resin and modified cement, aggregates and various admixtures – specifically designed as a bond or scratch coat to bond pool plaster over existing plaster finishes. The complete Bond-Tite System consists of two 65 lb. bags of Bond-Tite Dry Mix and one 5 gallon container of Bond-Tite Liquid Resin to be mixed at the jobsite.

Tools

Use GEP tools when installing PMM Pool Finishes for the best results! See our Pool Tool catalog for a full line of tools to meet all your pool installation needs.

Hard Coat

Use after existing or freshly set Portland cement-based products to strengthen surface coatings. HardCoat will reduce or eliminate efflorescence while enhancing colors. Reduces "plaster dust" and surface porosity.

Warranty

Limited Warranties are available for all Pool Finishes, see the Premix Marbletite Pool Finish Products Limited Warranty Form.
