Coronavirus

This test is not available in NY

MDL now offers the SARS-CoV-2 [COVID-19] by Reverse Transcriptase Real-Time PCR (CDC NI, N2, RP targets) which has been authorized for emergency use authorization (EUA) by the Food and Drug Administration (FDA).

Coronavirus Disease 2019, or COVID-19, is the name for the respiratory syndrome caused by infection with severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2). The virus, which has infected and caused deaths of thousands of people worldwide originated in Wuhan City, China. Additional cases have now been reported in the United States. An infection with coronavirus 229E, NL63, OC43, or HKU1 is not the same as a COVID-19. Patients with COVID-19 are evaluated and cared for differently than patients with common coronavirus diagnosis.

Test No. 1131 SARS-CoV-2 [COVID-19] by Reverse Transcriptase Real-Time PCR (CDC N1, N2, RP Targets) This assay has been authorized by the Food and Drug Administration (FDA) under an Emergency Use Authorization (EUA)

- Nasopharyngeal swab OR Oropharyngeal swab specimen collection submitted in a **COVID-OneSwab®** transport media vial

- **NasoSwab®** specimen collection for adult patients ONLY (may be self-collected on-site)

- Specimens should be refrigerated until ready for transport and shipped with a pre-frozen cold pack within 72 hours of collection
