The new Viridian X SERIES Gen 3 is the next generation of the original green laser/light combo with an upgraded design, brighter tactical light and rechargeable battery, HD Camera and audio. Fits most full-sized railed pistols.

Details

More Information

Viridian introduces the world's first Weapon-Mounted Camera with a light and laser designed to clearly capture full-HD video and crisp audio specifically from handguns and long guns. The popular X Series Gen 3 line has expanded and now delivers even more robust features with the addition of a full-HD digital camera and microphone, creating an entirely new category for personal protection, training, and recreational/competitive shooting.

The new X5L Gen 3 with Camera comes standard with a 500 lumen LED light, green laser, multiple operation modes and Viridian's patented INSTANT-ON[®] technology. Combined with a 1080p full-HD digital camera and microphone, this unique solution provides convenient playback for training, range time or competitions and gives legally armed citizens an added level of reassurance when carrying or in a home defense situation.

When the user chooses to utilize Viridian's proprietary INSTANT-ON[®] technology, the unit automatically activates the laser, light and/or camera, depending on the pre-programmed settings, whenever the firearm is drawn from its holster. Not only does this eliminate risk of failure to manually turn on the device during a personal-defense scenario, but it allows users to conveniently capture footage to help review and correct shooting techniques or show off days at the range with their friends. The highly advanced camera provides an unobstructed view from the end of the firearm, making it an ideal replacement for homemade action cams or supplement to the everyday carry setup.

Key Features:

- 500 lumen LED light
- 5mW green laser sight (510-532nm)
- Mini USB port and indicator lights for onboard charging and file transfer
- IPX7 waterproof rating (exceeds 1 meter for 30 minutes)
- Extra batteries and chargers available
- Integrated microphone
- 1920 x 1080 HD video
- INSTANT-ON technology
- Fits most holsters designed for the Streamlight[®] TLR1[®]
- Fits most full-sized handguns and rifles
- User-defined operating modes
- 2 year limited warranty

Operating modes:

- Solid Laser
- Solid Laser/Solid Light
- Solid Laser/Strobe Light
- Pulsing Laser
- Pulsing Laser/Solid Light
- Solid Light

Note: Software is PC compatible only.
