[Log In](#)

# Drop passwords. Use magic links.

Enable customizable, future-proof, passwordless login with a few lines of code.

[Get Started](#)

- 1 Enter email
- 2 Click the magic link
- 3 Done! You're in.

## Go Passwordless

Upgrade

Reduce

### Security 🏋️

Every 1k passwords breached causes \$240k in damages.

81% of breaches are due to poor passwords.

### Overhead 💰

Handling 10 tickets daily will cost around \$128k annually.

50% of support tickets are password-related.

### Conversion 🚀

Remove passwords to improve conversion rate by 54%.

Passwords increase friction by over 60%.

SOC 2 COMPLIANT

## Exfiltration-Resistant Infrastructure

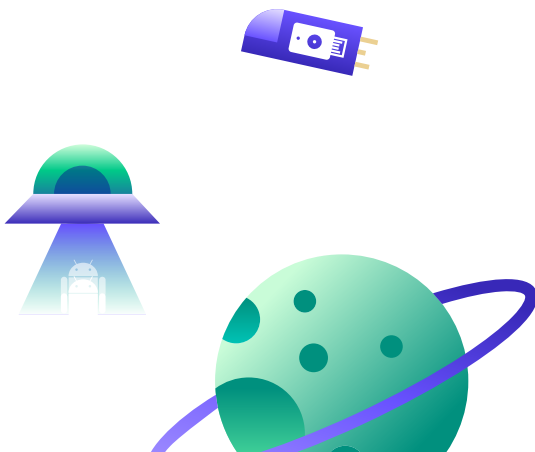

Instead of passwords, users log in to apps with zero knowledge proofs encrypted by hardware security modules and elliptic curve cryptography.

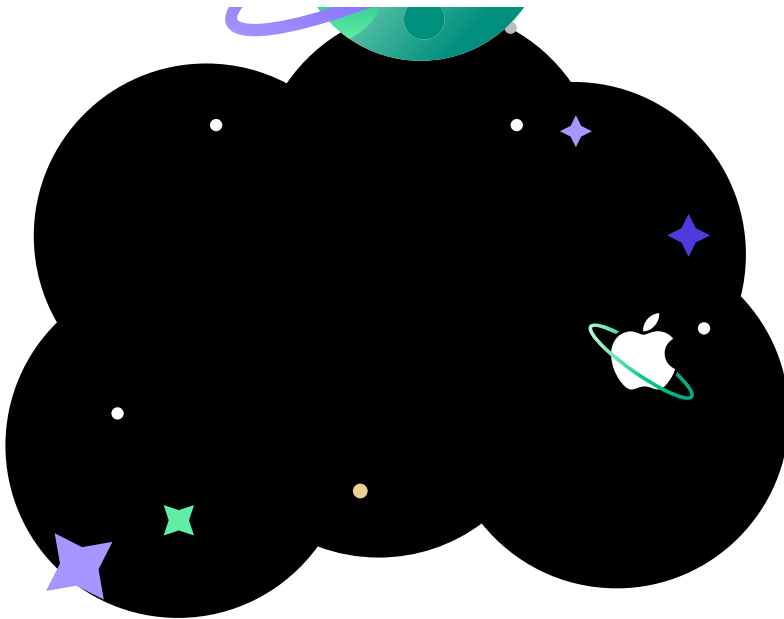

[Deep dive into our security →](#)

## Write Once, Works Everywhere

Plug-n-Play even if you have an existing auth solution. Enable users to log in via desktop, mobile, or FIDO devices.

One-click login with Magic mobile app

COMING SOON

Currently supported in JavaScript and will support all common languages and frameworks.

## Build Future-Proof Applications

User identities are based on blockchain keypairs - unlocking new business models and eliminating platform lock-in.

Our [Delegated Key Management](#) infrastructure has been a battle-tested standard in crypto.

## Battle-Tested Standard

“ Password-only security is broken and dangerously insecure. Magic

FEATURED ON Product Hunt 860

links eliminate the headaches of lost or stolen passwords and protect app users. Magic is a critical step forward for app security and user experience.
