- **Carefully Tuned Sound:** Balanced and Neutral frequency response. Unlike most condenser microphones, this podcast microphone does not sound harsh and will not stand out in your mix or sound fatiguing over time. Good for podcast, studio vocals, pianos, stringed instruments, and percussion.
- **High Quality Diaphragm:** Our capsules are made using the high-grade brass and Japanese imported mylar. They are manufactured with the most precise machinery to achieve higher sensitivity making them able to reproduce subtle sounds. This makes it the perfect condenser microphone for a variety of sources.
- **Extreme Low Noise Circuit:** Our custom transformer less JFET circuit is made with German capacitors and components with a tolerance as low as 1%. It features gold traces for high conductivity, great performance without distortion, and a noise floor of less than 13dBA.
- **Steel Body:** Our podcast microphone body and frame are made out of high-grade steel with a durable grill to protect the capsule and ensure that every of our condenser studio microphone will last a lifetime.
- **Strict Quality Control:** Every podcast microphone goes through our intensive testing procedure. This includes a frequency sweep test as well as a self-noise test to ensure every circuit performs within specifications.

**From the manufacturer**

**Highlighted Features**

**Highly Optimized Circuit**

Our custom designed transformer-less JFET circuits are made with carefully picked audiophile components that feature strict tolerances. Our circuit boards utilize gold traces for high conductivity and better performance.

**Hand Tuned Capsules**

Our capsules are made with pure brass and use Japanese imported mylar. They are manufactured with high precision machinery to achieve good sensitivity making them able to reproduce sounds accurately.

**Quality Control**

Our microphones go through our strict quality control at our small facility. This includes a frequency sweep test, visual inspection, as well as a self-noise test to ensure every circuit performs within specifications.

Most low-cost condenser microphones have a noticeable harsh and bright tone that makes them hard to sit in a mix and can sound fatiguing over time. The Stellar X2 is different in that we carefully tuned its capsule and circuit to produce a sound that is very smooth and easily sits in any mix without the tinny harshness of low-cost condenser microphones. Furthermore, our custom-made low noise transformerless JFET circuit uses high-quality components such as German imported WIMA capacitors and high tolerance parts. Our K67 style capsule is made from Japanese imported Mylar and is gold sputtered with our proprietary technology. The combination of these features yields a microphone with a high output signal, extremely low distortion, low self-noise, and a very balanced sound. To ensure every microphone provides maximum gain without distortion, the JFET in every Stellar X2 is manually biased in-house so you can rest assured that your microphone will perform at its best. In addition, we use a high-quality steel body with powdered coated paint to ensure this microphone will last a lifetime.

★★★★★ **Great microphone. Warm, clear, natural, and quiet**

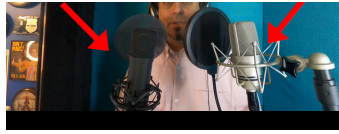

Reviewed in the United States on December 2, 2019

**Verified Purchase**

This microphone is perfect for studio use because in addition to having a clear, natural warm tone, it's super quiet. The self-noise / noise floor is super

Amazon.com: Stellar X2 Large Diaphragm Cardioid Condenser XLR Microphone: Home Audio & Theater

That's very important for people looking to do voice recording because the recording is clean and clear without needing to apply any post production filtering. This not only saves you time in post production, your final mix is better off when you start off with as few filters as possible.

In addition to the low noise floor, what I love most is the tone. It's warm and natural. I've used mics in the past that were either too muddy or too bright and harsh

★★★★★ **BEST MIC I HAVE EVER OWNED!**

Reviewed in the United States on December 11, 2019

Verified Purchase

The hype is real! I'd heard about the Stellar X2 back in September and that it was supposed to be every bit as good as a Neumann U87, and for a tiny fraction of the cost! I've never had the money to buy a U87 (which is over \$3,000) so I've always used what I could afford. But when I finally got my Stellar X2 in the mail (shock mount and pop filters in my video/photos are ones I already had, not what come with it) I was blown away! This thing sounds phenomenal. I've been a strong advocate for MXL mics for years (and still stand by them, they make outstanding products) and when I compared this with my V67G (a great low-cost mic) there were similarities, but the Stellar X2 definitely

won out with overall richness of sound, and the biggest difference was the low noise floor. It was extremely

The Truth

★★★★★ **The quality of a \$1000 Neumann without the harshness and pricetag.**

Reviewed in the United States on December 16, 2019

Verified Purchase

Wow! Still picking my jaw up off the floor! I've been a professional announcer for a long time, and I've never heard anything like the Stellar X2 at this price point. Listen to the audio on my video for yourself. I recorded the entire video with the X2 in the worst possible scenario on purpose - an open room with no acoustic foam, no pop screen, and with my screen door wide open with 1-95 less than a mile away. (Yes, I do have a booth, but this thing sounds phenomenal even if you don't).

PROS:

- Price! Buy 5 of these for one Neumann.
- Quality. It feels and sounds amazing.

-- Plastic but very well padded carrying case.

Mike Kelly

★★★★★ **My new voice over mic! It's Freakin' Stellar!**

Reviewed in the United States on December 13, 2019

Verified Purchase

Having worked in radio and music production and having used the famed U87 I have always wanted that sound for my home studio but in no way could justify that kind of money. When I saw the 1st review of this mic on Booth Junkies youtube channel I was a little skeptical but after giving it a 2nd and 3rd listen with headphones I was blown away! It took a few weeks to be able to order a unit and when the time came I had to wait again until I checked the Amazon order page and low and behold ... available!

Got the unit into my booth and set up a quick A/B against the RE20 that I've been using for the last 5

years for voice-over work. I added in my basic audio chain (a few select waves plugins) and it didn't take but a few
