- **The Strong Non-jamming Performance:** The remote control car has a wireless control system which runs with a 2.4GHz frequency. What means that it can offer a stable signal and it has a non-jamming function which without remote confusion though two or more vehicle racing together. In addition, you will never get any radio interference with this RC car which you can control it flexibility to drive forward or backward, turn left or right
- **Large Battery Capacity:** This RC car equipped with high capacity rechargeable 4.8V 800mAh battery pack. After fully charged (150 Minutes), then battery pack can be used around 20-30 minutes ceaselessly. The USB charger has several functions such as overcharge protection and short circle protection, to a large extent avoid accident like battery catch on fire which increase the safety
- **Two Modes of Transformation:** This new design RC cars allows you to drive on both sides and the RC car with 4 wheel drive, front and rear dual motors provide strong power torque which able to conquer various terrains like grassland, sandy land, muddy grounds, mountain roads, snow and so on. In addition, the speed of our remote control car reaches up to 15-20 km/h, which makes the car race faster than others, RC car will bring you a special driving experience
- **Durable Crashworthiness & Non-slip Tires:** Hollow rubber wheels are crashworthiness and non-slip, reducing shocks when the car is driving. Due to its hollow rubber tire with shockproof gaskets, to prevent damages caused by the vibration effectively, in the meanwhile it shows super climbing ability and able to cross the obstacles

## Product description

**WARNING: THIS PRODUCT IS NOT RECOMMENED FOR KIDS WHO ARE UNDER 6 YEARS OLD! DO NOT LET YOUR KIDS PLAY WITHOUT SUPERVIOUS.**

### Question & Answer

**Q:** Solutions for battery recharge issues and remote controller's frequency modulation issues

**A:** 1.It takes about 3-4 hours for the battery to be fully charged.

2. The red indicator light will be turned on and stays lit while the battery is charging, and the red indicator light will go off after the battery is fully charged.

3. Turn on the remote control car before turn on the remote controller, the indicator light of the remote controller will flash for 2 seconds which indicates the remote controller is modulating the frequency according to the remote control car. The indicator light of the remote controller will go off after the modulation of frequency, and it will stay lit while the remote controller is being used.

4. Certain circumstances that cause a flashing indicator light:

- (1) The volume of the battery is low, it can be either the remote control car's battery or the battery of the remote controller. Please check and replace the battery.
- (2) A failure of frequency modulation, please turn off both of the remote control car and remote controller and try again.

5. The speed of the remote control car will be limited and the steering system will be failed when the battery power is running low, please replace the battery as soon as the indicator light is flashing.

Remote Control High Speed 2-side Driving Car

### Package includes

★★★★★ Oh! This one's fast and hilarious

Reviewed in the United States on July 9, 2019

Verified Purchase

This one's a great toy. Kids will definitely love it. The most cool feature is the one click transformation. Please see my video, you can make it dance :D. The speed is pretty good too. I only wish they had provided with one extra rechargeable battery. Note that you would need to buy 2 AA batteries for the controller. I felt the controller buttons were little stiff and had to be pushed all the way through to make it move. A smoother speed control would have been nicer.

★★★★★ Great RC Car for all ages!

Reviewed in the United States on March 14, 2020

Verified Purchase

This is a great RC car for a boy learning to play with RC cars. I bought it for my son who is 6 years old to play with. I have bought a couple in the past but he didnt seem to enjoy it that much. But this time it was different, he absolutely loves this car and he has a blast playing with it. The one thing

this car differs from the other ones was the ability to transform to get out of sticky situations. It works great on cement, grass, and even dirt! He plays it for about 30 min - 40 min outside so I'm not sure how long the battery is supposed to last. It comes with a usb cable so you do need a box to charge it in. You won't regret on this purchase and plus mine was used but everything still worked great and was

a little cheaper!

★★★★★ **Good learning toy for RC beginners**

Reviewed in the United States on January 1, 2020

**Verified Purchase**

This isn't a bad beginning place. I gave it a 5 because it's aimed at kids and beginners and it accomplishes that very well. There are some flaws though which aren't significant but are annoying to an adult. First the throttle is simple on/off switch for forward and backward. You can either go all out in either direction or stop - no in-between or graduated acceleration. I wish there was a definitive front to the item as it makes it difficult to determine which way the controls are working (just a pet peeve) I'm sure they don't want the battery falling out but a Phillips screw is a slow process to lock in the battery. Eventually, you'll need to replace the screw with a larger one since it going into plastic. Battery charge time is around 4 hours which to me seems long. Thankfully you are provided with 2 battery packs. Overall for kids and beginners it's a decent product.

Andrew

★★★★★ **Best RC car i've had yet.**

Reviewed in the United States on January 15, 2020

**Verified Purchase**

Compared to the 1/10 scale monster Jam Grave digger and the 1/14 maisto rock crawler, this car is better than both. 2.4 GHz controller is a must! the 800 mAh battery is substantially better than AA's or non replaceable. it's a little smaller than I expected but it's good for driving inside or outside which is key. the rubber tires don't tear up furniture/walls if driven inside (which will happen in the winter). my 30 lb toddler actually stands on this thing (I freak out every time) and it has withstood the abuse. the conversion feature is really neat. I wish the battery cover didn't need screws but at least it doesn't fall off and they included a nice little magnetic screwdriver which is a nice bonus. buy an extra battery (with this or any car) for extra enjoyment. It's quick little sucker too but not so fast that kids can't control it. great value in the price range. go cheaper and either the battery or controller will be reduced quality. more expensive is diminishing return on enjoyment for kids.

JF

★★★★★ **Awesome RC Truck!**

Reviewed in the United States on January 1, 2020

**Verified Purchase**

Comes with 2 battery packs, charger, remote and car. Remote has forward-reverse, left-right, and a button that makes the wheels go up or down. With the wheels down it will run up and flip over on almost any vertical surface then keep going on the opposite side. This car almost can't be stopped. With the wheels up it will act as a monster truck to small toy cars. My son loves it. The two battery packs allow you to have one charge while still playing with the car. Battery life in the car is good with about an hour of start and stop running. Still haven't changed the remote batteries yet with over two weeks of playing with it.

★★★☆☆ **Disappointing Purchase**

Reviewed in the United States on December 28, 2019

**Verified Purchase**

The box says it all, "For ages 6 and up.." if you are a 6 year old with low expectations, this car may be a good fit for you. However, there are far better choices. There are numerous frustrations with the design of the car. First, why are their two small screws that must be removed using the supplies small screwdriver to remove the battery for recharge??? That makes no sense. It's a major pain in the neck and the tiny screws will soon be lost. Second, in off road mode, the car is too tall to make turns without rolling over. The wheelbase is just too narrow. Why design a car, even a toy car, that sits too tall to make a routine turn without rolling over??? It makes no sense. Also, the whole transformation thing is just a gimmick. The car may perform better in some ways in off-road mode, but it frequently tips over - and there is no way to right itself using the transform functions. Finally, the car isn't very fast even in street mode. So that's why I give it 2 stars.

★★★☆☆ **Was so excited, but then dissapointed**

Reviewed in the United States on May 2, 2020

**Verified Purchase**

I got two of these for my twins 6th birthday. The battery takes forever to charge (5 hours), and then after only 10-15 minutes of usage it stops working. Also the remotes crossfire with each other and cancel each other out if that makes sense. Now one of the cars doesn't even work. Pretty disappointing. It's more of an inconvenience. When it does work it's Awesome!! But it mostly doesn't work so... I'll be ordering new remote control race cars it looks like. I

★★★★★ **All sort of indoor/outdoor fun!**

Reviewed in the United States on December 29, 2019

**Verified Purchase**

Kids and adults loved having this to play with on Christmas morning. Battery life is excellent, good speed and handling and simple enough for my 5 year old to drive. Love the ability to transform. Would be nice if it could contract 2 ways. Great value and would highly recommend.
