BEANS

MAG ISSUE 2

BEANS represents diversity and accepting the differences in others. There are all kinds of beans; jelly beans, green beans, black beans, white beans, bean sprouts, etc. There are so many different shapes and colors that no one bean is the same. This to us represents the idea that everyone has something special about them. Everyone has their own things they're into and those things make them special. BEANS is here to embrace and inspire that idea.
