### Overview

We are business trial lawyers and strategic advisors. Mortenson Taggart's lawyers hail from the world's leading law firms. During their tenure with these firms, our lawyers gained invaluable experience working on high profile, bet-the-company trials and precedent setting appeals. Mortenson Taggart was born from a desire to eliminate big-law firm inefficiency by providing more agile, streamlined and aggressive legal services to Fortune 500 and mid-market companies, as well as our entrepreneur and early stage clients, who seek more value added service.

At Mortenson Taggart, our clients are our partners. Their goals become our goals. We seek to develop long-standing relationships with our clients by consistently achieving our clients' goals efficiently and cost-effectively. Each case we agree to take on is designed to achieve our clients' goals—whether that is winning at trial, obtaining a favorable settlement or avoiding litigation altogether. At the outset of each case, we determine and identify the key issues and the critical evidence, and map out a strategic plan for success. This allows us to determine and doggedly focus on what really matters in the case, and move it quickly to trial or resolution, which ultimately saves our clients money and consistently delivers what our clients have called "exceptional" and "superb" results.
