Direct Metal Laser Melting (DMLM) machines

Direct Metal Laser Melting (DMLM) machines

DMLM metal machines from Concept Laser use lasers to melt layers of fine metal powder and create complex metal 3D geometries with incredible precision directly from a CAD file. Several different machine envelope sizes — including the largest powder-bed metal additive system in the world — are available to meet the needs of any industry. Innovative features, including the patented LaserCUSING® technology, set these machines apart.
