# Shed light on the
eDiscovery process.

Legility Spotlight is a business data analytics dashboard that provides full visibility into all of your key metrics, including data spend, ROI and reviewer statistics. Users have immediate access to any structured data set. Spotlight delivers decision-making dashboards so you can see exactly what's going on with all the matters you manage - where your data is, how much each project will cost, and how long it will take. Spotlight enables teams to pull the levers they need to get the work done on time, under-budget, and right the very first time.

Instantly see key metrics, volumes, and benchmarks on your own data in real-time.

Quickly and accurately demonstrate a quantitative ROI on your eDiscovery investment at the board level.

By mapping data visually, Spotlight can help identify gaps in data sets based on chronology or help spot missing custodian data.

Budget preparation is a snap with fully customizable charts and graphs. With over 80 pre-designed charts, Spotlight has you covered.
