THE VISION... AND A LEGACY

that helped shape the modern drum industry. Since 1849, Rogers Drums rose from the first U.S. calfskin drum head manufacturer into one of the most innovative drum and percussion brands on the planet. Rogers hit its stride during modern history's most transformative decade – the 1960s, and this "Golden Era" of the brand brought new inventions, sound and style to the world of drumming- that had never been imagined before. Today, Rogers returns- celebrating the vision, and the legacy of their Golden Era, and carrying forward the brand's creed for percussion innovation into the 21st Century.
