- The high-performance micro-woven fabric is suitable for optical and laser sensors, which can improve the accuracy and smooth tracking ability of the entire game surface, which is very suitable for daily work or games.
Using a non-slip rubber base, the mouse pad can be firmly fixed in place to prevent any slippage from interrupting and affecting your work or game.
To avoid suffering from carpal tunnel syndrome / "mouse hand", do not make your wrist too tight when using the mouse, try to keep your wrist level.
The thick heavy-duty braid maximizes durability and prevents surface peeling, abrasion and deformation after prolonged use.
Easy to wipe, repeated washing will not fade, and even liquid stains can be washed with soapy water, so that it can be used continuously.
