Individual Tax Prep

Millions of tax preparers believe that they benefit from using a tax preparer because going at it alone is sometimes just too confusing.

With the changing regulations and laws every year, it is a great asset to anyone to have a certified tax preparer translate what the changes actually mean.

- Professional tax preparation and advice
- Mid-year review included in the preparation fee
- Electronic filing
- Tax Planning
- Consultation on how to adjust withholding to minimize taxes at year-end or have more use of your money throughout the year
- Estimated payment calculations
- Suggestions on how to minimize your audit risk
- Free review of prior-year tax return

Our mobile services ensures that you get the most updated information and that your tax return reflects just that. We look for every tax refund opportunity that you are eligible for and ensure we ask all the right question to prompt those opportunities.

Base Rate: 1040 (\$150)*

*Base rate is the initial starting price but may vary depending on the needs of the client.
