### Description | Reviews (1)

- PERFECT PERFORMANCE: 6mm in thickness offers the most comfortable experience for all level yogis. Most mats are either too thin or too thick. Our yoga mats are guaranteed to provide the optimal level of cushion and protection for your joints and knees.
- ECO FRIENDLY: TPE material is environmentally friendly, durable and without smell, which makes the exercise mats as new as you received it even after long-term use. TPE material has a higher density than NBR and PVC materials used in other yoga mats, making our mats have very good elasticity.
- NON-SLIP TEXTURE: The non-slip properties of yoga mats are critical to safety. Our yoga mats use proprietary bottom pattern and exclusive upgraded double-sided non-slip texture design to resist sliding, which can provide excellent traction and superior grip whatever on wood floor, tile floor or cement floor.
- LIGHTWEIGHT & PORTABLE: This yoga mat is only 33oz. It is very light so that you can easily take it anywhere with the carrying strap. If you want to go to a GYM, you can just take it and avoid using the public yoga mats, which is cleaner and healthier.
