Description

[Reviews \(1\)](#)

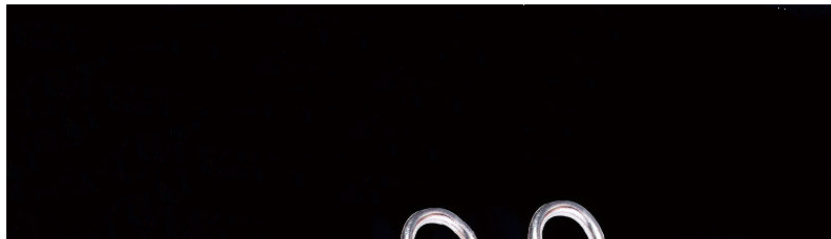

Affordable & Repairable: Much more tensile than steel cable and can be repaired on the spot with proper braiding methods, this rope can withstand all the pressure that comes along with pulling.

Cost performance: More affordable and much safer than traditional steel cable, It is great works for Off Road Vehicle SUV ATV UTV Winches Truck Boat Ramsey Car.

Heavy-Duty Construction: Made of 12 strands braided ultra tough nylon, this synthetic winch rope, which is rust and waterproof, UV, chemical and Weather resistant, this rope can bare Average of 10000lbs strength cable.

Premium Protective Sleeve: Black Sleeve Protecting it from abrasion, sun exposure, overheating and corrosion, which could effectively prolong the life of the synthetic rope.

Safety performance: When that cable finally breaks, it becomes a steel whip that is capable of doing serious damage to a person or your precious off road vehicle. But synthetic rope on the other hand, does not store energy when wound up. So under the extreme case that the rope fails, it is not going to hurt you.
