CHOOSE THE RIGHT SIZE — With three width options, our straps fit most watches and smartwatches. Just make sure to choose the right size for your watch or it WILL NOT FIT. Measure your watch's lug width in mm (see illustration in the pictures section for how to measure), check your watch manufacturer's website for your watch's specs, or see our list of smartwatch widths in the product description below for smartwatches from Asus, Fossil, Moto, LG, Pebble, Samsung, Nokia, Withings, and more.

A NEW LOOK IN NO TIME — Just pop out your original watch spring bars, then slide the built-in quick release lever on our nylon strap to pop it in. No tools or engineering degrees required. And who says you have to stick to one shade? Our stylish watch straps come in multiple colors, so you can switch it up in seconds. Color coordination was never so timely.

FLEXIBLE FIT — Archer Watch Straps' nylon quick release straps will fit wrists from about 5.5" to about 8" around, depending on strap width and watch size, which will comfortably fit most men and women. But if you do have an issue with fit, or anything else, we offer a money back guarantee.

RUGGED YET COMFORTABLE — We use two layers of durable 1.2mm thick nylon to make these straps. They are so strong and thick that they may take some breaking in when you first start get them. But once you start wearing them, the straps will start to take on the shape of the curve of your wrist and become incredibly comfortable. After all, your wrist shouldn't have to suffer to be beautiful.

ADVENTURE-READY — Strong durable nylon. Heavy duty stitching. Stainless steel buckle. This washable, waterproof watch strap can handle the office, the gym, the white water rafting trip - and look amazing doing it.
