

# Our name and mission are derived from the stars

People have used the stars for navigation throughout history. We chose our name carefully knowing that we help guide our clients throughout their financial journey.

## Astra Value

At Astra Wealth Management Group, we embrace our responsibility to provide perspective, knowledge and personal counsel to help guide and protect your family's wealth. Through our independent business model, risk-managed investment approach and open communication style, we work to build your family's trust. This trust is the foundation for sustaining wealth.

## Working to raise the bar on wealth management

A family of significant wealth has many moving parts. There are investments, tax considerations and many times, family and inter-personal dynamics are involved. All these components are important and inter-related when managing your wealth.

## Resources, technology and experience

We believe the complexities of today's world requires greater access to financial resources, advanced technology and knowledge than ever before. That's why it has been and will continue to be our priority to provide our clients with a special combination of investment discipline, wealth planning experience and client service excellence.
