WHO

WHO WE ARE

onIT is a team of customer oriented technology professionals in Northwest Arkansas. We are techies, parents, musicians, runners, bikers, friends and more.

Our team is passionate about helping businesses be successful through technology.

WHAT

WHAT WE DO

We specialize in business IT. We are great at fixing problems but ultimately, we proactively manage technology to minimize downtime and increase productivity. We help companies and organizations create effective solutions that enable them to run their businesses proficiently.

WHY

WHY WE DO IT

That's simple. We love to serve. We set ourselves apart by filling the gaping hole of customer service that exists in the IT world. Our business model is built to serve you well. Your business success is our goal.

WE FIRMLY BELIEVE...

PEOPLE MATTER

At the end of the day, we want your IT to serve you, your team, and your business. We love to help and support you.

KEEP IT SIMPLE

Technology has to be useful and accessible. One without the other makes a solution worthless. By marrying the useful and the accessible, solutions become an integral part of your business that will help you grow.

NEVER STOP LEARNING

We love to learn and are always interested in the next software or hardware release. Learning is what makes our job fun. As we learn about your business and how technology can help your success. We are looking out for the current trends that might become your perfect tool.

ASK MORE QUESTIONS

Technology can fill a need, but it can also be a hindrance. We ask questions to understand fully what your company needs. We come up with solutions that are relevant because we choose to be curious.
