# MODERN SOLUTIONS FOR GLOBAL ENERGY ISSUES

1/3 < >

“

Wiltech has the solution to energy security. We believe The Wiltech Energy PolyGen will change the way solar power is delivered.”

— Oswald Wilson, Founder & CEO

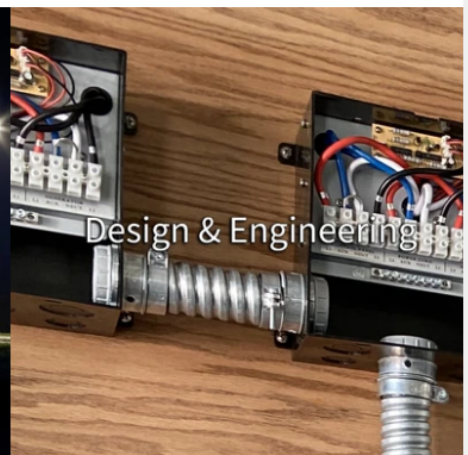

## WHAT WE OFFER

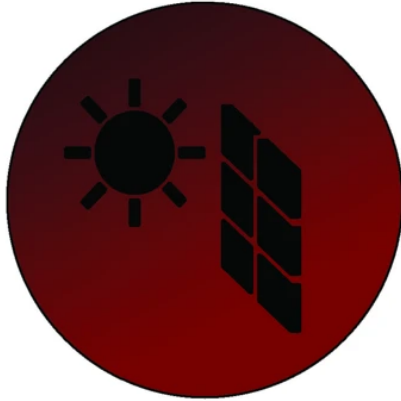

Our patented vertical approach will change perceptions of how we structure energy harvesting

Our lighting solutions illuminate with great style and efficiency

We will design, engineer, build and maintain your project

**VERTICAL SOLAR**

The **Wiltech Energy PolyGen**

**"MORE WITH LESS"**

Utilizes limited land space by being vertically mounted onto poles in different polygonal configurations and NEVER onto rooftops of houses and buildings.

Our Answer to a Horizontal World.

**WIND TURBINE**

The **Wiltech Energy PolyGen** can be designed in combination with our patented wind turbine unit to further lower energy costs.

**SCALABILITY**

Due to scalability, The **Wiltech Energy PolyGen** solar panels are stack-able and can be designed as grid-tied, off-grid or a combination of both. Thus generating more energy based on power requirement needs.

Our patented system is made to last and only uses the best available materials, sourced with your parameters in mind.

**ANYWHERE**

The **Wiltech Energy PolyGen** generator system can absorb the sun from ALL angles and locations. Thus more of the sun's energy is able to be stored much faster and more efficiently.

The **Wiltech Energy PolyGen** can be used anywhere in the world including remote areas, Deserts and the North and South Poles. It is a great system for Yurt Structures too!

**ENERGY SOLUTIONS**

We provide green energy power and lighting for eco-tourism conservation:

This includes providing power for electric vehicle charging stations, residential, industrial and governmental buildings, airports, roadways, perimeter security, disaster preparedness, agricultural solar farms, irrigation, remote communication towers and traffic signal systems worldwide.

Our space saving, efficient designs were developed with the needs of our planet in mind.
