Easykey Desktop Fan 90°Rotating Desktop Fan Usb Silent Fan

Price: \$ 28.99

65 sold in past month

Easykey The design uses a desktop to prevent the handle from breaking. Very suitable for home, office, movies, sports, travel, etc. A must-have for family and friends

Safe, one-button operation, made of high-quality materials, very safe for children and adults

It only needs a button to operate easily, press the button to turn on/off the fan, and then press repeatedly to adjust the wind speed.

The built-in powerful motor can provide a variety of different strong cold air speeds, allowing you to choose the right wind speed according to your needs.

Large capacity, long-term operation, the fan can be charged through a USB cable through a laptop, mobile power, car charger, etc.

I bought this fan for my home office desk - I have a tendency to run hot and it's a relief to have a fan directed at my face. This little guy is perfect. My desk hutch is the perfect height to direct at my face, but I like that it is adjustable. No wall plug but that's fine, I just have it plugged into one of my computer's USB ports. I LOVE the variable speed as opposed to the usual low/medium/high settings, and it's pretty powerful! It's pretty quiet and isn't disruptive to my partner (with whom I share the home office). I just ordered another one for my TV room which tends to be a little hotter than the rest of the house. Perfect for personal use!

I use a bedside fan for the breeze as well as for the white noise. My previous fan had metal fan blades and was starting to develop a clanking noise. I was interested in the adjustable speed and removable grate features of this product. For reference, I sleep about 3 to 4 feet from the fan. I was unprepared for how powerful this fan would be. It is a suitable bedside fan at the lowest setting, but the adjustable knob makes it a versatile fan. I've already found myself using different speeds in the short week I've owned it. The knob is a little tight, which prevents accidental adjustments (but also means turning it off and on may require more effort than a switch or button). The sound is soft and consistent, with perhaps a hint of a "whir" at higher speeds. It doesn't compete with our baby monitor, and our Echo device (six inches away from the fan) can hear our voice commands over the sound. At its highest speed, the sound is no louder than the lowest setting of a standard box fan (although this fan has a higher pitch). The front grate easily removes and can be reattached just as easily. The angle can be adjusted, but only upwards (it cannot be tilted to face down). At this price, it's a steal.

My daughter has a small bedroom with no ceiling fan and not much room or need for a large fan. This little fan is powerful and really delivers air. It feels as powerful as our more traditional 12", oscillating fans but much quieter and compact enough to put on a bedside table. The speed is easily adjusted with the twist of a knob which is nice, because many usb fans seem to be fixed speed. While it doesn't oscillate, I don't find that necessary and usually use those fans stationary anyway. It has enough adjustability to be able to direct the air where you need it. The base is sturdy and doesn't make the footprint of the fan larger than the fan itself. We have usb outlets in our house and also usb power bars, so it is convenient to plug in where needed. We haven't had the need to use battery power yet, but it is nice to have that option if needed. It would be a nice little fan to take camping.

Overall I am pretty happy with the fan. When I first turn it on it tends to make a repetitive clicking noise but if I smack the fan it usually goes away. I use it at work and I'm the only employee most of the time. When I run it at around 50% is when it sounds best. It puts out a good deal of air and makes hardly any noise. I also like the ability to slide the top back and fourth so I could angle the fan up towards my face while I work. If it weren't for the clicking which is clearly something loose or out of place inside, it would be a 5* purchase Update: After a week the noise is not getting any better. It's actually starting to get pretty annoying. If it weren't for the noise it would be awesome, but the rattle is getting more and more annoying to hear and it seems to get louder over time. A good smack sometimes makes it stop for awhile lol...I should have sent it back for replacement but I was too lazy. Shame on me. :(

Your browser does not support HTML5 video. I bought this fan to add some air circulation to a tray of leggy seedlings I have. It puts out a lot of air for such a tiny fan! The angle of the head is adjustable. It's made really sturdy and it's very quiet when it's running.

Zachery 2020-12-10 16:47:46

Okay so this small desk fan can really blow you away. It's powerful but power comes with noise. It's not as quiet as I'd like it to be. Another issue I have is that the knob to operate the speed is very hard to use on a desk. You almost have to pick it up to turn the knob but maybe I have sausage fingers and this isn't an issue someone else has. I also wish this little fan could angle up any higher than what it can. It uses a slider to slide to the desired angle but I wish it had a little more "slide" to go up just one more inch or so. Overall I like the fan and I'm glad I got it on cyber Monday. Had I paid anymore for it I would return it.

Ellie Qian 2020-07-12 11:29:27

Your browser does not support HTML5 video. I love this fan. As you can see, it looks exactly like the picture. It is super cute, minimalist small yet powerful. I place it next to my bed and use it mostly before bed when I try to avoid using the AC. A must have for the summer, would highly recommend.

Diego 2020-02-28 18:43:58

even have to crank it all of the way up to enjoy a great breeze. Not only that it's very quiet. Nobody even knows I have it on. Also another pro is that this little buddy is the easiest fan to clean, just rotate the faceplate and pop it off. I would highly recommend this to others and I have already bought one as a gift to a friend and she loves it also.

Sara H. 2020-07-23 19:17:58

I really like this small fan! It's super powerful for being so small and I love the turn dial and that there isn't just two or three wind settings. I use this fan a few feet from my bed on medium power and it keeps me cool at night! I also use it while at my desk when I want a breeze, it's very easy to move around because it's so light and is USB operated! Edit after less than 6 months of daily use: the fan has stopped turning at all! I've tried everything from switching the cord to the wall-plug-in to different outlets and it simply doesn't work anymore. I loved it when it did work as it so tiny but so so powerful and you can clean it easily. Depending on how the seller responds to my question regarding this product I will update the review again! I really like it so hopefully customer service is good and willing to help me figure out a replacement or refund.

Y.P. Wang 2020-06-25 12:18:21

I bought this fan for my work desk, I have used this for several days and I love this cute small fan! The fan is super lightweight and also very quiet, even on the highest setting. It is worth buying.
