How does the Preventative Maintenance program work?

KORE's experienced technicians will return equipment to OEM specs for a fixed cost.

When an emergency arises, KORE will be there with 24/7 on-call technicians.

KORE will keep track of assets and repairs. After each PM visit, you will receive a checklist outlining the services performed.

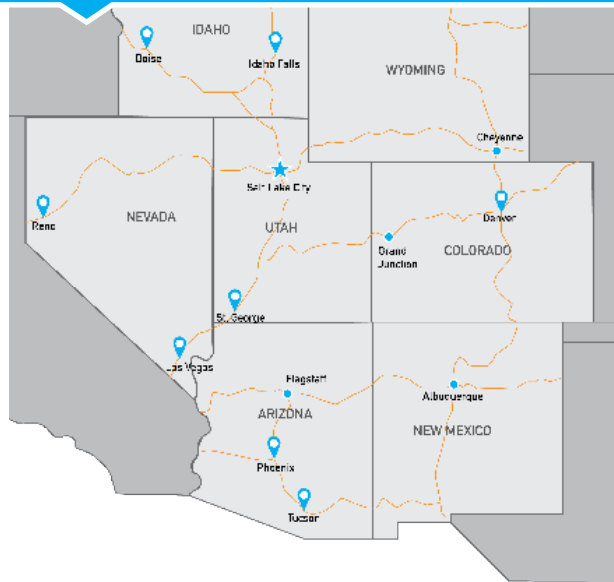

With your equipment running efficiently, you can avoid costly breakdowns and minimize downtime.

From inventory to employees to customers, you have plenty to worry about. With over 100 technicians and decades of experience, **KORE will care for your equipment so you can focus on everything else.**
