CancerCare | About Us
access2cancercare.org/about/

Our Purpose

The Coalition to Improve Access to Cancer Care (CIACC) is a patient-focused organization representing patients, health-care professionals, care centers and the life sciences industry.

Our Mission

Scientific breakthroughs have dramatically changed the way we treat cancer. Unfortunately, public policy has not kept pace. Outdated rules for insurance coverage force patients to pay much higher out-of-pocket costs for medicines taken orally than those injected or administered intravenously. The Coalition to Improve Access to Cancer Care is committed to ensuring life-saving medicines are more affordable for the patients who need them.
