## ABOUT US

Welcome to Cyber News Live (CNL) – a live streaming broadcast on mainstream and social media channels to friends, family and everyone alike. CNL is going to cover top “cyber” news, relevant to you!

You get your fix of daily news by listening to the stock report, traffic report, weather channel...and now the new addition to the family – CNL. I want you to watch CNL while having your breakfast, lunch, dinner or even drinking your daily coffee.

Why? Because in every single day we are affected by cyber and you need to know what is happening, where it is happening, why it is happening, when it has happened and what to do!!!

As reported by Forbes.com, the annual cost of cyber crime is projected to be in the trillions of dollars and cyber security spending is set to reach \$170 billion by 2020.

To put this in perspective think about your favorite sports franchise and the amount of air time they receive in comparison to the cyber industry. CNL is bridging that gap.

Thank you for visiting, please remember to like, share and subscribe to the “Major League” of cyber reporting.
