More Training. Less Stress.

Don't let learning management get in the way of great learning. Hundreds of thousands of courses are delivered through an Inquisiq LMS each month. Our clients rely on us to help them deploy, manage, and track education programs to their employees, members, customers, partners and volunteers. Inquisiq automates tedious administration, offers fully branded multi-tenancy options, and supplies your learners with the courses they need when they need them – so you can focus on building great training programs.

Value-Priced and Feature-Rich eLearning Technology

All the features and functionality you need (and want) at a price you can afford.

Configurable Interface

A mobile-friendly, skinnable, and multilingual interface enables custom user experiences.

SCORM Compatibility

Enables easy interoperability with all learning content authoring tools and third-party course libraries.

Blended Learning

eLearning, instructor-led and on-the-job training can be administered through one platform.

Social Learning

User communities, messaging center, walls and feeds can be enabled to facilitate spontaneous communication.

Learning Automation

Course enrollments, group access, report generation, and permission management are out-of-the-box automations.

eCommerce

Integrated shopping cart, payment gateways, public course catalogs, discount code creation and distribution are standard functionality.

Our Clients

Inquisiq Solves These Training Challenges

Corporate Training

As an organization with corporate training requirements, you can face unique challenges related to your courseware and learners, including detailed reporting, certifications, and managing a range of instructional solutions. Inquisiq's higher level of functionality goes beyond the typical LMS and is specifically designed to meet these challenges!
