Dry Seed Finisher  
Slip • Shine • Sheen

Micro-Plastic Free!™

NET CONTENTS – Pounds (US)  
X BOX 25

Product Code: AAF638

MADE IN USA

Batch #: AP21B034

#### INGREDIENTS

Kannar SeedKOTE Selekt SlipShine 6300 v1.0.

High performance seed coating as a dry blend of inerts suitable for fooduse pesticide formulations; for enhancing seed.

Note: Product is sold by weight and not volume. Settling may occur.

May form combustible dust concentrations in air. Suspected of causing cancer.

Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Wear protective gloves/ protective clothing/ eye protection/ face protection. If exposed or concerned: Get medical advice/ attention. Store locked up. Dispose of contents/ container in accordance with local/ regional/ national/ international regulations.

#### DIRECTIONS FOR USE

SlipShine™ 6300 is a dry bulk formulation. Application should be on seed with the aid of commercial seed treaters specifically designed for accurate application of dry bulk simultaneous with liquid seed applied technologies. We do not recommend attempting to disperse SlipShine in liquid slurries.

Use with Kannar SeedKOTE™ Selekt polymers to promote adherence on seed, flowability of treated seed, and to minimize dust-off.

Do not use treated seed for food, feed or oil purposes

Perform a jar test of all slurry components, paying attention to order of addition. Verify compatibility of slurry ingredients and assess appearance and performance of seed coated.

Always follow the manufacturer's labels for any additional material mixed with this product.

This product should be applied to seed while still tack from liquid seed applied technologies. Applying product to dry seed will cause excessive dust, while applying too early (when seed is still too wet) will result in less optimal appearance and slip of the treated seed.

#### RECOMMENDED RATE

Dry Oz. / CWT  
1 to 3

All seed

Use higher rate for smaller seed.

Various factors will influence your application rate decision. We recommend a ladder study with varied amounts of SeedKOTE™.
