This classic wooden shape classifier is very interesting! The beautifully crafted toy has smooth natural wood, dovetail joints, sliding lids and 12 cutout shapes on four sides. 12 kinds of brightly colored solid wood shapes are easy for small hands to grasp and fall into the shape classification cube, thus forming a wonderful "old block". Install the part in the matching hole, then pour it out and do it again! An illustrated guide on the label can help identify the names of shapes-from triangles and trapezoids to parallelograms to pentagons. High-quality craftsmanship and classic design make it a timeless toy, and its sturdy structure ensures that it lasts for many years of hands-on play and learning. The shape classification cube helps teach classification skills, color and shape recognition, and helps children develop and hone fine motor skills. It encourages problem-solving and builds hand-eye coordination and manual skills. As children ages 2 and older gradually face the challenge of matching the shape to the correct hole, confidence and self-esteem will continue to increase. This toy is designed to stimulate imagination, stimulate exploration and encourage natural curiosity, so that they can learn for life! From classic wooden toys to creative handicrafts of all ages, our timeless products can be naturally educated and enriched like game time. Since the establishment of the company, we have been committed to producing excellent children's products and focused on hands-on play and excellent customer service. We put our own name on every product we produce-symbolizing their commitment to quality, attention to detail and dedication to improving family entertainment time around the world. This ultimate shape sorter has 12 large, bright shapes, and when they fall into
