Description

SPIRALIGHT TECHNOLOGY! Whether your well or city water was tested positive for bacteria and viruses such as E Coli, salmonella, etc, w/ our Spirallight technology & larger water capacity, a larger spectrum of bacteria & viruses that require longer exposure will be successfully destroyed by spending more time exposed to the UV. The spiral is made out of transparent plastic that reflects the UV light. And because the water is being tossed & turned, no bacteria can hide behind any mineral particles.

UNIQUELY-DESIGNED: Our UV filter doesn't have O-rings & end caps that if you don't tighten carefully, can cause cracks in the quartz tube which will lead to leaks & damage the bulb. We use 2 sealing gaskets that are proven more effective. It comes with a lightweight carbon-fiber body & more powerful lamps. Most of our competitors use 15mm tubes. Ours is 19mm giving us a larger energy per square energy. We only care about the actual energy being delivered to the water & NOT the power of the lamp.

EASY TO INSTALL : Our uv water purifier is so easy to install that even first-timers can do it. It comes with 2 well-built metal clips that are strong enough to keep the unit in place. You don't need some plumbing skills in order for you to do it since it also comes with a minimal and very easy to follow instructions that are very clear and straightforward. It is a very well priced, uv water purifier with lamps that last longer and works very well with your whole house water filter system.

DOESN'T OVERHEAT: Because YARNA's UV water purifier's body is made of a carbon fiber material, the casing & the water inside only gets warm & does not get very hot that it might present itself as a fire hazard compared to other poorly made UV water filters. And since our uv water sterilizer is constantly on & the water doesn't get too hot, then you don't need to wait for a minute or so for the hot water to flow out once you turn it on. In this way, you won't waste water and electricity!!

RISK-FREE 100 DAYS - 100% MONEY BACK GUARANTEE: Our promise is that you will enjoy bacteria-free drinking water and filter out any harmful microbes in your water supply as long as our YARNA UV Water Purifier is installed. To that end, should you not be satisfied with the product's performance, you have 100 days to return it for a full refund.
