Toy Gun Kid's Rubber Bullet Pistol Mini Pistols, Children's game toys gun

With a real blowback style loading mechanism.

Simply rubber bullets into the magazine, load the magazine into the gun, pull back the slide to chamber a round, and pull the trigger to release a rubber bullet! Bullet will travel only a few feet to keep things safe. The fun of this toy is the realism of it's mechanics, not the distance or accuracy of the projectile.

100% brand new and high quality.

Compatible with any pistol holster that will fit the real thing,making it the perfect choice for game or cosplay where realism matters

The fun of this toy lies in the realism of its mechanical principles, not the distance or accuracy of the projectile.
