Does it work with 220v? If not do you have any other sprayer that can work on 120-220?

Technical Support · a day ago

In the USA we have tools that work with 110V electricity. In other countries, where they need it, our tools are all 220V. We don't have any tools that operate in both voltages.

Can Wagner 3000 for primers for my ceiling ?

Technical Support · 11 days ago

Yes it can. Keep the gun tilted to a maximum of 45 degrees up towards the ceiling for your project. The 4000 model would allow 60 degrees, which makes it a little easier to spray the ceiling. For more application tips call us at 1-800-328-8251.

Can I use acrylic paint in the 3000 sprayer

Technical Support · 18 days ago

Technical Support · 24 days ago

Thank you for reaching out to us. The Flexio series designed for the U.S is for use on a 120 Volt circuit.

Can you use the 3000 for staining decks?

Technical Support · 24 days ago

Thank you for reaching out to us. Yes the Flexio 3000 can be used for staining decks but we would like to know which brand of deck stain you are using. Some decks stain can be very thick and it is not recommended to be use with a sprayer. Please give our technical support a call at 1-800-328-8251 Monday-Friday 8:00am-4:30pm Central Time and we will be able to assist you.

Hi I've been using this gun for 5 months spraying cabinets. Using the finish nozel it's worked great. I've followed all your instructions. It's been great until now. It won't spray a drop, it just builds up pressure. What might the be the problem?

What are the nozzle diameters on both front ends? Do you have to thin oil based clear polyurethane?

Technical Support · a month ago

The iSpray front end is set up for your fence, deck and walls and will leave a roller like texture with unthinned latex paint. It has a 2.5mm nozzle. The Detail Finish front end is set up for your trim, furniture and cabinets and can leave a fine finish with thin materials. It has a 1.8mm nozzle. Oil based poly most likely does not require thinning. Power up high and paint flow low for better atomization. Spray from 6" away and apply a wet coat with each pass. For more help call us at 1-800-328-8251.

How long can I leave the paint in the sprayer

Technical Support · a month ago

We suggest no more than a couple of hours at most. If it will be longer than that you should clean the sprayer.

How much does it weigh?

Technical Support · a month ago

Without paint in the cup the Flexio 3000 weighs 6 lbs., while the Flexio 4000 gun only weighs one pound, without paint in the cup.

FLEXIO 3000 SPRAYER - looking to purchase specifically to spray paint internal house ceilings for home renovations - Do you need a Flexi head attachment to do this job correctly?

Technical Support · 2 months ago

For your ceiling project you should get the Flexio 4000 as it separates the turbine from the sprayer. Making it about 6lbs lighter and it also allows the sprayer to tilt up, up to 60 degrees for the ceilings. The 3000 can only tilt up, up to 45 degrees. We do not make a "flexi head" for this purpose. For more help call us at 1-800-328-8251. <https://www.wagnerspraytech.com/products/paint-sprayers/flexio-4000-paint-sprayer/>
