## FURNO 700 HEAT GUN

\$ 69.99

BUY NOW

4.9 (15)

Write a review

The Wagner FURNO 700 heat gun is suited to the heavy DIY'er who knows how to use these power tools. The heating gun has the most precise temperature settings and multiple fan speeds to help accomplish many projects that require heat.

This high power heat gun comes with additional accessory nozzles, making it easy to tackle a variety of projects such as softening putty and caulk, decoupling headlights, removing decals, molding hockey skates, removing crayon from walls, waxing skis, remove ceiling paint, stripping paint and thawing frozen pipes.

### FEATURES

Temperature settings range from 125°F - 1300°F

LCD Display screen with push-button controls

Five fan settings and cool-down setting

1500 Watts/ 5100 BTUs

Includes two nozzles (glass protector and flare nozzles)

Integrated stand for safe hands-free operation

DOWNLOAD MANUAL

How long can the Furno 700 stay on while in the 300-400° range without turning it off?

Answer this Question

Technical Support · 9 months ago

Keeping in mind that the Furno is a homeowner tool and not meant for industrial use, it can stay on as long as is needed for the project. Should the tool overheat, it will shut itself down to prevent any problems. Don't forget to use the cooldown feature when you're done.

If this gun at it's hottest 1300F; can it weld aluminum with low temp sticks?

Answer this Question

Technical Support · 9 months ago

This is not something we have tested, but it's added to our list now.  
We know that brazing rods can go down to about 700F, but we are not sure that enough heat will transfer into the metal to make it work well. Most welders would use a map/butane torch for this application.

Hello, motor type is brushless (induktion) ?

Answer this Question

Technical Support · a year ago

The Furno heat tools are not brushless. For more information call us at 1-800-328-8251.

The Furno 750 weighs 5.5 lbs.

now do I test if I have a Furno 700 or a 750

Answer this Question

Technical Support · 2 years ago

Furno 700 comes with Glass Protector Nozzle and Flare Nozzle.  
Furno 750 comes with a storage case, 4 nozzles and 5-in-1 painters tool.  
Both of this heat gun have the same settings and fan speeds.
