REVIEWS & COMMENTS

The Kiesel Guitars Custom Shop is excited to announce the all-new **Lightspeed** Series headless guitars. Available in 6 and 7 string models, as well as multiscale variants, the Lightspeed is modeled on the popular Hyperdrive Series, in a headless design. Like all Kiesel Guitars Custom Shop instruments, the Lightspeed Series is made in the USA, and loaded with features, along with having Kiesel Guitars full complement of Custom Shop options available. The Lightspeed LS6 is a boutique instrument, without the boutique price, and you can build your Lightspeed exactly the way you want it, and be the proud owner of an instrument that will last you a lifetime, and that will really stand out on stage.

The only way to appreciate the performance of a Kiesel Guitars instrument is to use it in your own environment, giving it the test of "real world" performance. Take 10 days to try out your Lightspeed LS6. If you're not completely satisfied, you can return it - no questions asked. Your trial period starts when the merchandise is received by you, not when it's shipped. Really give it a workout. If you're not satisfied for any reason, send it back for a prompt refund or exchange - you would only be responsible for the return shipping. (US and Canada customers only; international customers, see [here](#))

Lightspeed Series guitars are not available in left-handed configurations.

The LS6 is built at the Kiesel Guitars Custom Shop in Escondido, California.
