

World's first remote team escape

Best high tech escape room in San Francisco

Choose your team escape adventure

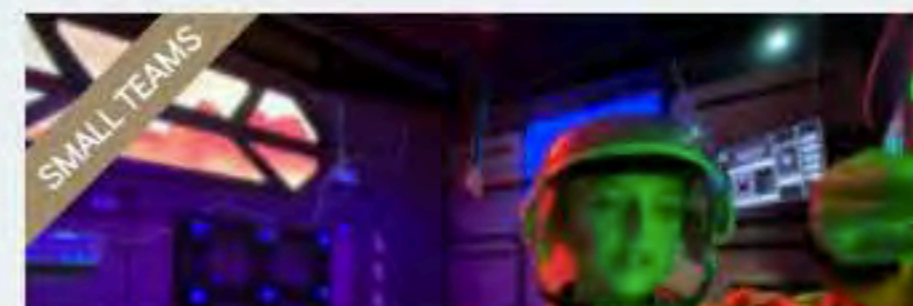

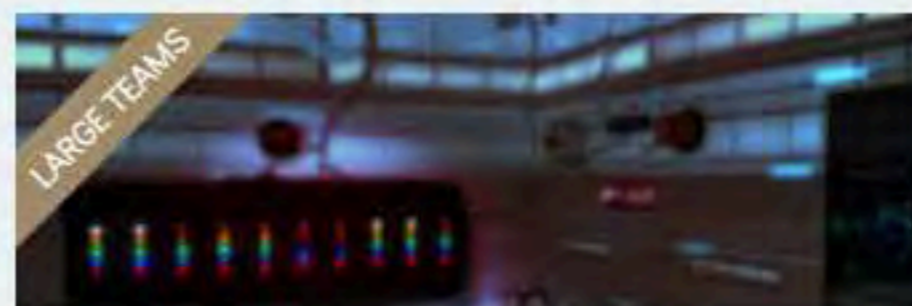

Choose your team escape adventure

The screenshot shows a virtual escape room interface. At the top left, it says "Emergency Virtual Assistant". Below that, there's a status "Nailed It!" and a message: "We now have our landing site dialed in." To the left, there's a video feed of a lunar lander on the moon surface with the text "ARMSTRONG THE SINGLE ONE WINS" and "We are ready to initiate final launch preparations." To the right, there's a video feed of a person in a red spacesuit in a control room. In the center, the text "CELEBRATE YOUR TEAM" is displayed. At the bottom, there's a list of tips for a successful mission:

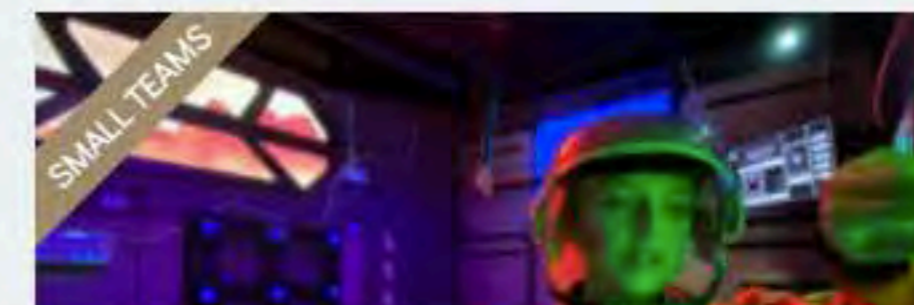

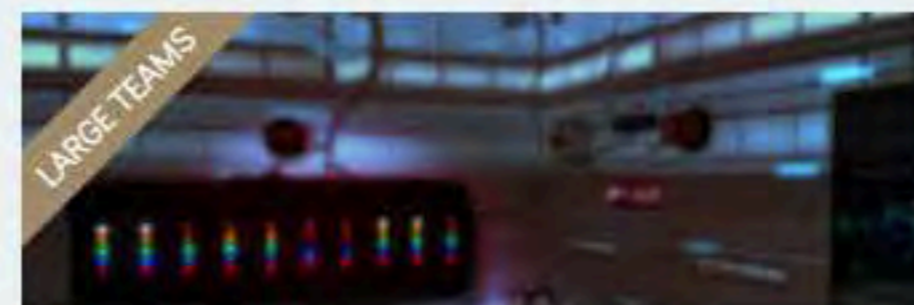

Tips for a successful mission:

- Everyone should engage with content, don't rely on one person.
- You can full screen Lunar Station feed above, reload if video freezes. Note: 3 second video feed delay.
- Open zoom and this page on a computer if you are on a phone.
- Materials are used only once. Eva prefers answers in lower case.
- If you need help during breakout, you can use the "ask for help"
- Smile and have fun! 🍷

At the bottom of the interface, there's a banner that says "AND EXPERIENCE THE MOST ADVANCED REMOTE TEAM ESCAPE ON THE PLANET".

Lola in Space^o

World's first remote team escape experience! Lola in Space^o is a light-hearted puzzler with a feel good narrative.

The game video conferences team members from different locations to interact with a real-life "Lola" virtually who is trapped in the supply module of the International Space Station.

Play Anywhere

Moonshot^o

A brand new massive remote game specifically designed for large scale team building. An astronaut is stranded on the Lunar Station. Players can remote control props on the station, interface with a real-life avatar, interface with an AI mission assistant, and collaborate with each other to launch the first rescue mission to the moon.

Play Anywhere

Lola 2 Mars^o

Lola is back in Space and this time she is on a Martian mining colony.

The colony has been damaged by a series of dust storms. Your team has an hour to interact with a real-life human Lola to get the outpost back online and make a tough moral decision that will impact the future of Mars exploration.

💡 60%+ of the top 15 companies on Glassdoor's 2020 Best Places to Work in the U.S. choose Reason for their team building needs.

Pushing the boundary of immersive experiences

Since 2016, Reason has been considered by hundreds of Silicon Valley companies as the best escape room and high-tech team building partner.

We are the creator of the world's first **future tech escape** and **remote team escape**. Our one-of-a-kind experiences are built purposefully for collaborative problem solving and technology exploration.

Pushing the boundary of immersive experiences

Since 2016, Reason has been considered by hundreds of Silicon Valley companies as the best escape room and high-tech team building partner.

We are the creator of the world's first **future tech escape** and **remote team escape**. Our one-of-a-kind experiences are built purposefully for collaborative problem solving and technology exploration.

Each game is located in hand-crafted sci-fi sets and features the latest in emerging tech such as VR, holograms, robotics, etc. We have the largest escape rooms in the industry designed for team building and are experienced in coordinating large corporate event such as workshops, happy hours, and off-sites from 5-300.

Reason is an independent business located in the SOMA neighborhood of San Francisco with a mission to humanize our relationship with technology and each other. You can experience Reason remotely from anywhere in the world or physically in San Francisco. Check out what the press is saying.

 <p>"With the Reason, the bar for what to expect [in an escape room] has just been astronomically raised.. with the integration of drone, virtual reality, 3D printing and more into their high-tech escape</p>	 <p>"One way to humanize modern technology? Get trapped in a room with it and try to escape. A "future technology" game leaves us ready to hug our Roombas!"</p>	 <p>"By placing teams in an alien environment, Reason's space encourages strategic thinking, problem solving, and thinking outside of the box!"</p>	 <p>"The Future Technology Escape Room in San Francisco is an innovative concept that brings technology exploration and team building adventure together!"</p>	 <p>"At Reason, players can use new technologies to help them escape, such as a 3D printer to fabricate an object that will aid their progress."</p>

Booking guidelines

- Time slots are in Pacific Time Zone (San Francisco)
- This is a new format escape room where players do not have to be physically present
- Each Player occupies one Player Slot
- Booking is private and comes in a bundle of 5 Player Slots
- 7 additional players can be added at check out
- No one else will be matched to your booking
- You will need a computer or mobile phone with internet connection.
- Please be ready and join the session on time.
- Headphones highly recommended.
- No prior technology experience required
- Bookings are not refundable but transferable (you can have someone else play your game instead)
- While Lola in Space is a casual uplifting puzzler, Lola 2 Mars is a more challenging game
- Players who have completed Lola in Space can get a 10% discount on Lola 2 Mars
